RE: Test Report R20090033

We have analyzed 2 samples of Platysol Day Cream and Platysol Night Cream, which you submitted on February 4, 2009, using High Performance Liquid Chromatography (HPLC) for the presence of Cortisone, Cortisone Acetate and Dexamethasone.

Our analysis did not detect any of the steroids listed above. The detection limit of our test method was estimated to be 5 parts per million (ppm).

Please feel free to contact us if you have questions or need additional information.

Very truly yours,

Dr. Jonathan Chun
Director of Technology
Alliance Technologies, LLC
